

COMPACT PRICE LIST

Valid from 06/2024

At HSK, you get more than just a glass splashback. State-of-the-art and tested production technology allows us to customise the products to your individual requirements: made to measure, fast and flexible. Complete your bathroom furnishings with coordinated products from HSK such as shower cubicles, shower trays, fittings, wall cladding and designer radiators – all from a single source.

As a strong company in the region, we are proud of our qualified team, because people make the difference for us. Long-standing and experienced employees work on products with high functionality and quality at an excellent price. A high level of motivation and personal commitment in sales, technology and production ensure outstanding service and satisfied customers.

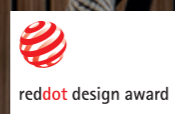

The topic of sustainability is also very important to us and is promoted and practised under the slogan "HSK Goes Green". We are constantly working on optimising materials, packaging, transport routes and work processes. The fact that our efforts have been recognised and that we were awarded 1st place as a TOP BRAND in the "Environment and Sustainability" category under the heading "Shower enclosures" confirms and motivates us to do even more for sustainability.

Yours

Joachim Schulte-Lohgerber

Joachim Schulte-Lohgerber
Managing Shareholder of HSK Duschkabinenbau KG

The Hochsauerlandkreis is the home of HSK. Like many other traditional companies, we feel very much at home in our location, because our heart beats for the Sauerland region. As a family business with a long tradition, we have developed from here over many years into an internationally active company and a strong partner to the sanitary trade. We produce shower solutions and provide the necessary warmth in the bathroom.

Double protection with TwinSeal

Step 1: Using a specific magnetron technology, the open-pore, raw glass is sealed with a high-resistance corrosion protection layer. This ultra-thin, colour-neutral coating prevents limestone sticking and the glass becoming dull (corrosion).

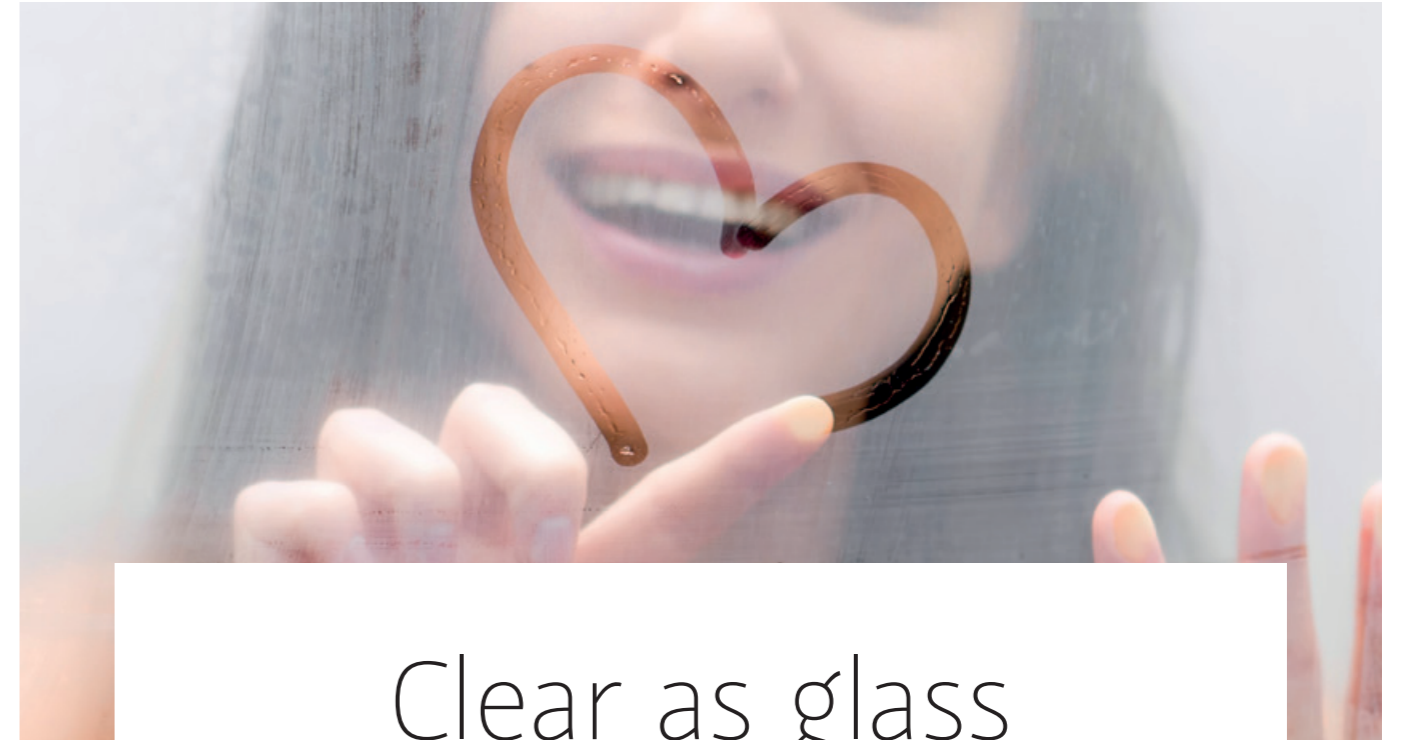

Step 2: A hydrophobic nanolayer is applied giving the glass a special characteristic which is comparable to the drip-off effect of a lotus flower. When sitting on the TwinSeal layer, the water contracts so that it will drip off more readily.

Limestone and grime don't stick to the glass.

Limestone and grime coalesce with the glass. The glass is soiled.

Clear as glass

TWINSEAL GLASS SEALING

The groundbreaking technique allows for the double-coating of the glass surface of shower cubicles, thus providing twice as much brilliance. With the **TwinSeal** glass sealant, we have created a one-of-a-kind surface protection system that delivers a maximum of corrosion resistance together with convincing hydrophobic characteristics. This combination endows the inside of the glass with a double protection, thus ensuring superlative transparency. There is no more need for the cubicle to be cleaned after every shower. Just remove any deposits once a week with a microfibre cloth.

The benefits

- + 10 years guarantee
- + High corrosion resistance
- + Hydrophobic characteristics
- + Keeps limestone and grime off
- + Easy to clean
- + Improved hygiene

Environmentally friendly

Minimised use of cleaners means that **TwinSeal** glass is particularly eco-friendly, which we are happy to support.

Walk In Exklusiv 2.0 bi-fold door swinging with inline panel

This Walk In bi-fold door offers a classic yet timeless solution for the whole family. It is ideal for small spaces or airy room concepts. The door element can be completely folded inwards or swivelled around the fitting. The glass-flush hinges on the inside and innovative profiles make cleaning the shower cubicles beautifully easy. The black matt colour rounds off the bathroom design and creates a modern look.

The concept

PURE + PURE PRO

A minimalist design concept that optimally combines functionality and design.

PURE + PURE PRO | The concept

PURE + PURE PRO

Endlessly combinable

Pure – minimalist to a maximum, where you need experts for taking measure and installing as there is no adjustment possibility, whereas we offer adjustment with the very slim profile of the Pure Pro.

Tailored to your taste and your bathroom situation, you can combine the profile colour, the glass design and the product finish in many different ways. The Pure range is fitted with pivoting hinges that are flush with the glass on the inside and is supplied in a standard height of 200 cm.

Tightness and splash water protection

Completely dispensing with wall and floor profiles cannot achieve absolute impermeability. However, transparent seals significantly prevent splash water from escaping. Optionally available water mouldings additionally reinforce the splash protection.

Without a water bar, splash water may escape

The optional water moulding provides increased impact protection

Straightforward design with high standards

K2^P

These shower cubicles bring elegance to the bathroom. Elegant aluminium profiles ensure easy installation of the high-quality glass.

K2^P | Straightforward design with high standards

A good combination

Advantages of both worlds: The high quality hinge from the K2 series is combined with a clip profile. This means that the K2^P can cope perfectly with uneven walls and enables easy installation.

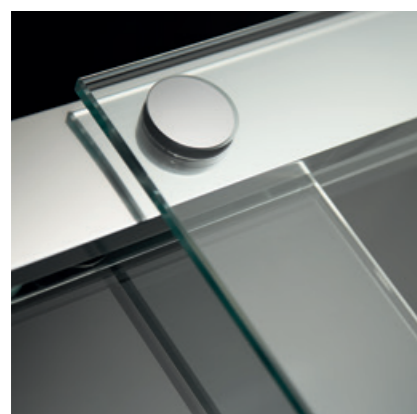

Easy to clean

The K2^P hinges are flush with the glass on the inside and therefore easy to clean. This results in fewer deposits and makes it much easier to clean the glass elements.

Beautifully shaped

Shower cubicles thrive on high-quality materials and functional details. This means that the handles on the wide range of hinged, sliding, swing and bi-folding doors are also a special feature. HSK offers a wide range of handle solutions for convenient handling and timeless design.

Smooth

The doors in the K2^P series glide smoothly and quietly along a closed track. The design has already won two awards.

Modern lightness with profile

ATELIER PLAN

Clear lines combined with
8 mm thick glass elements
create a light look.

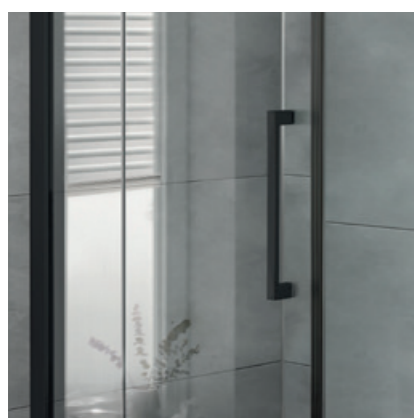

ATELIER PLAN | Modern lightness with profile

ATELIER PLAN

Straightforward

The Atelier Plan hinge, which is flush with the glass on the inside, impresses with its clear yet light design language. The standard rising/butt mechanism makes handling more convenient.

Striking

The handles in the Atelier Plan series are visual eye-catchers on the shower door and combine slimline design with convenient handling.

Reliable

A magnetic closing bar in combination with the ergonomic handles ensures that the 8 mm doors close cleanly and reliably.

Swinging

The Atelier Plan profiles of the bi-fold door solutions have chrome-plated pivot bearings with a swing function. The integrated rising/butt mechanism ensures easy opening and closing.

Our hinged products Atelier Plan are also available without profiles for a minimalistic look. Please contact our office.

HSK
BATHROOM EXPERTS

Hinged door swinging with inline panel and side panel.
Shower-set see page 121. RenoDeco wall cladding see page 142 – 159.

APERTO | Innovation for new open spaces

Comfortable

The award-winning Aperto hinge impresses with its spaciousness – the shower door can be swivelled inwards and outwards. Handles, hinges, wall profiles and stabilisation brackets are perfectly coordinated in design.

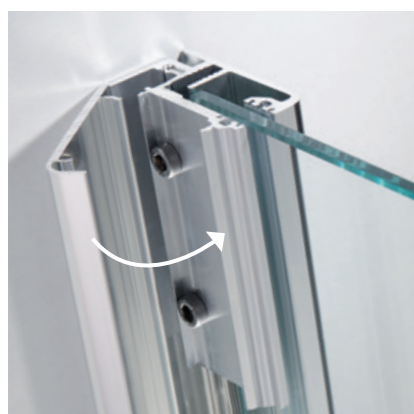

Easy to clean

All hinges form a perfect unit with the toughened safety glass (ESG) of the shower cubicles, as they are flush with the glass on the inside. This makes cleaning and caring for the glass surfaces particularly easy.

Stable

A solid stabilisation bar also ensures that the glass elements in Aperto are held securely in place. The rounded corners give the shower cubicles a soft look.

Invisible

The clip profile is also ideally matched to the other elements of the shower cubicles. The concealed installation technology ensures simple installation of the shower cubicles. The smooth surface of the profile is also particularly easy to clean.

The timeless trend in bathroom design

PREMIUM SOFTCUBE

Fresh design for a timeless and modern bathroom design:

This 6 mm series impresses with its extensive programme and wide range of options.

PREMIUM SOFTCUBE | The timeless trend in bathroom design

PREMIUM SOFTCUBE

Shapely

The fresh and soft design is reflected in the handles, hinges, wall profiles and stabilisation brackets. The optional bar handle and practical swing hinges provide additional convenience.

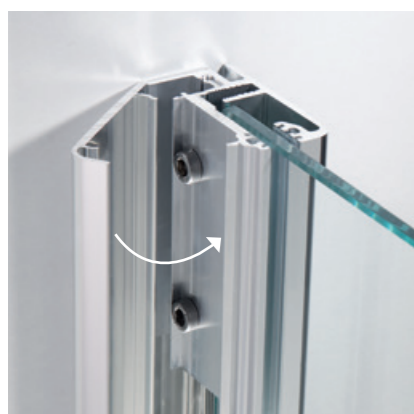

Easy to clean

The hinged and swing door hinges, which are flush with the glass on the inside, form a perfect unit with the toughened safety glass (ESG). This makes cleaning the glass surfaces child's play.

Stable

The Softcube stabilisation bar offers design with function. The glass holder holds the 6 mm thick glass reliably in place. The rounded corners emphasise the uniform look.

Invisible

The clip profile, which is designed to match the Softcube design language, ensures simple installation of the shower cubicles thanks to its concealed installation technology. The smooth surface of the profile is also particularly easy to clean.

EXKLUSIV 2.0

Technical perfection

EXKLUSIV 2.0

This awardwinning shower cubicle looks as good from the inside as from the outside.

EXKLUSIV 2.0 | Technical perfection

EXKLUSIV 2.0

Tried and tested

The Exklusiv 2.0 shower cubicles series combines the best of its predecessor model with well thought-out details to create a high-quality, modern shower concept. What remains is the familiar functionality and technical performance, without restricting the variability of special dimensions.

Functional

The ergonomic design of the various handle options emphasises the modern appearance of the Exklusiv 2.0. The standard knob handle or optionally available grip-optimised knurled handle always guarantee maximum ease of use and optimum grip safety when opening and closing the doors.

Stable

The visually redesigned stabilisation brackets and wall profiles ensure a contemporary appearance and secure hold. Colour-coordinated, they are available in the profile colours aluminium silver matt, chrome finish or trendy black matt.

Securely fixed

The flat wall connection profile of the side panel offers technical perfection – without visible screw connections – using special keder technology. The fixed elements are inserted into the fixed wall profile, aligned and fixed permanently and tightly. This ensures simple, fast and, above all, secure installation.

Gentle comfort with character

SOLIDA

Clear shapes, high-quality materials
and extra smooth ease of use: this is
the Solida – a threshold-free dream
shower with a solid character.

www.hsk.de/en/gb

Corner entry slider, 4 parts (no bottom profile)

SOLIDA | Gentle comfort with character

SOLIDA

Modern

Stability and durability:
These are the characteristics of the tried and tested 8 mm Solida series. The design of the profiles and the handles look modern and robust at the same time.

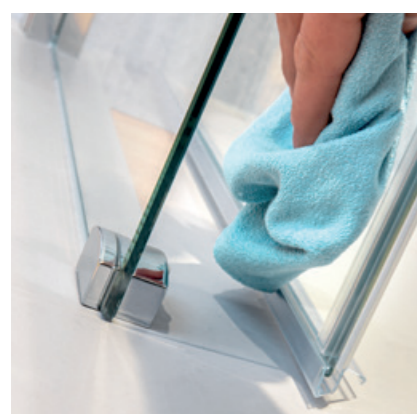

High-quality

The Solida models are equipped with a slide guide that moves the large real glass doors smoothly and quietly.

Optional extra soft

The optional soft-close mechanism enables extra-soft opening and closing. It pulls the large door element easily and independently into its opening and closing position.

Barrier-free

The all-metal door guide connects the fixed glass element securely to the floor. The sliding door is guided gently past the fixed element. The deliberate omission of a bottom guide rail enables threshold-free access.

Magnetic glider

The technically modified magnetic glide on the Solida ensures that the door is guided almost contact-free, while the doors run smoothly and are reliably stable. The innovative folding mechanism in the door guide is particularly practical. Thanks to this, the shower door can be swivelled inwards for easy cleaning.

Easy to fold down

Easy to clean

Modern design and strong presence

FAVORIT PLUS

Timeless beauty with a modern
look and functionality.
The ideal solution – not just for
tricky bathrooms.

FAVORIT PLUS | Modern design and strong presence

FAVORIT PLUS

Good grip

A special feature of the Favorit Plus is the grip-optimised door handle with knurled structure. It gives the shower cubicles an exclusive look and provides an extra portion of comfort when handling.

Functional

Sophisticated technology without compromise: The glass door is mounted between two pivot points set back from the wall, making it suitable for use in tricky bathrooms.

Reliable

With its striking profile design, the Favorit Plus pivot door is an eye-catcher in any bathroom. The magnetic closing strip ensures that the 6 mm toughened safety glass doors close cleanly and reliably. Convenient access is possible thanks to the particularly flat floor profile.

Easy to clean

The optional HSK Shield closes the invisible pores of the glass. This noticeably reduces the drying of water droplets and the build-up of soap residue, dirt and limescale. This makes regular cleaning easier.

The basis of all showering pleasure

SHOWER TRAYS

HSK shower trays are just as impressive in terms of design, quality and price as the innovative product solutions for barrier-free bathrooms.

SHOWER TRAYS | The basis of all showering pleasure

MARBLE-POLYMER SHOWER TRAY, STONE LOOK, SQUARE

Height without feet approx. 4 cm

Dimension in cm	Net weight in kg	Article no.	Price
90 × 90	51	5825090	668,-
100 × 100	63	5825010	703,-
120 × 120	91	5825012	821,-

Due to the stone-look surface, it is not possible for the water to run off completely without leaving any residue. No factory anti-slip coating possible for anthracite colour.

Colour range

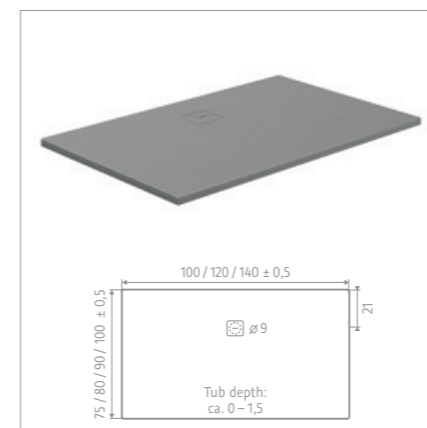

Height-adjustable legs
for optimum adjustment of the shower tray even on uneven floors.

Optional

AntiSlip – Increased safety

All shower trays can be equipped with a protective layer on the factory side for increased slip resistance.

MARBLE-POLYMER SHOWER TRAY, STONE LOOK, RECTANGULAR

Height without feet approx. 4 cm

Dimension in cm	Net weight in kg	Article no.	Price
75 × 100	48	5825710	642,-
75 × 120	57	5825712	675,-
75 × 140	67	5825714	709,-

100 × 120	76	5825112	742,-
100 × 140	86	5825114	779,-

Due to the stone-look surface, it is not possible for the water to run off completely without leaving any residue. No factory anti-slip coating possible for anthracite colour.

Colour range

CUSTOMISED CUTTING

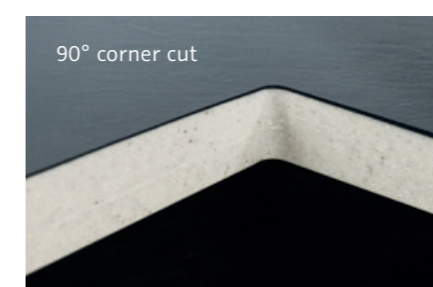

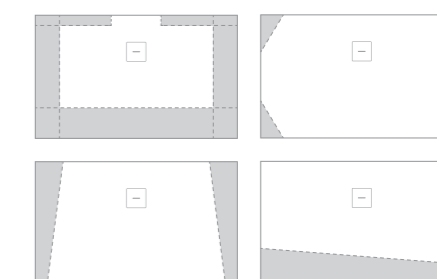

Flexible and precise

In practice, there are often complex and individual installation situations that place special demands on a shower tray, for example:

- Supply and installation shafts protrude into the shower zone
- Walls deviate from the vertical dimension
- The position of the drain set has to be changed for structural reasons
- The standard sizes of the shower tray simply do not fit

With bevelled cuts or precisely fitting cut-outs on all sides, the marble-polymer shower tray in stone look is suitable for almost all installation situations and offers maximum installation flexibility in addition to the wide range of standard sizes.

Cutting options

90° corner cut

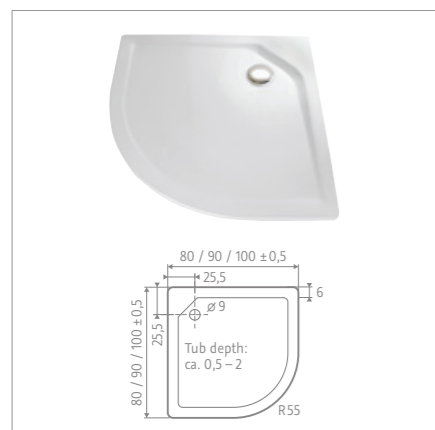

Diagonal cut

To avoid customised shower cubicles, the shower tray should be tiled in by a maximum of 1 cm.

All shower trays incl. height-adjustable feet, mounting rails and waste-set.

Warmth for well-being

DESIGNER RADIATORS

Clear shapes and colours for a timeless interior design as well as additional functions for more comfort – this is what the designer radiator range offers for bathrooms and living rooms.

DESIGNER RADIATORS | Warmth for well-being

Warm and dry

The modern design and high-quality towel rails create functional space for drying and warming hand and shower towels.

Discreet or striking

On request, each designer radiator is available in numerous other colours in addition to the standard colours. A special highlight: the finely textured surface of the colours sandstone, pearl grey and graphite black.

Flexible

In addition to many model dimensions, the extensive range of valve sets offers maximum flexibility. Variable screw inserts allow the thermostatic head and the "flow" to be rotated so that they can be used on the left or right.

Functional

Practical accessories for connecting and operating modern radiators: The connection fittings that can be used on both sides for the centre connection and the heating element 4 with remote control for electrical operation.

DESIGNER RADIATORS | Warmth for well-being

High-gloss, matt or finely textured:

The colour world of designer radiators shines in the most beautiful shades, sets accents and shows the radiator as a decorative living element – according to individual wishes. Coordinated with the latest colour trends, the selected range of colours is harmonious, fresh, timeless, discreet, decorative and striking.

Connection sets for a perfect connection

For optimum connection of the designer radiators to the central heating system, the modern range also offers suitable connection fittings for centre and side connections. Tailored to the different connection types and practical requirements, the sets have high-quality thermostat controllers with graduated temperature limitation.

Possible variations

Centre connection

- Compact valve
- Angle valve set
- Straight valve set

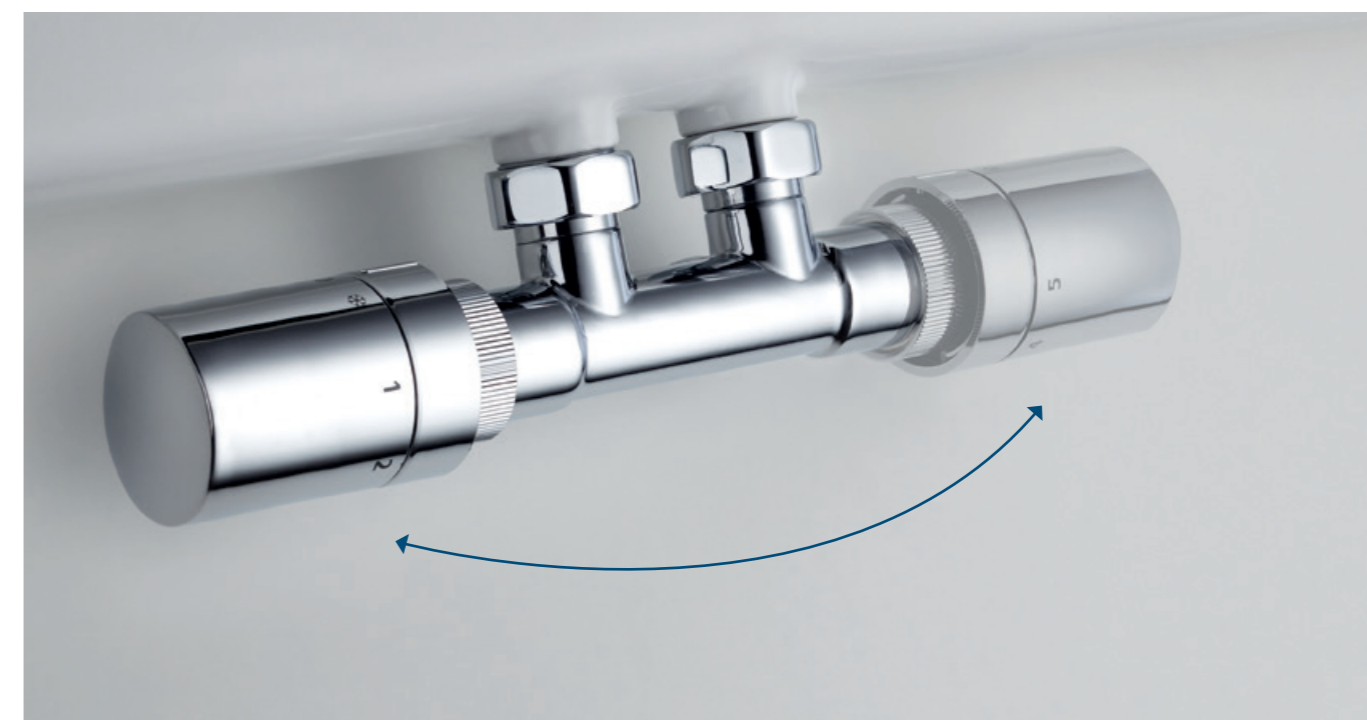

Side connection

- Angle valve set
- Straight valve set
- Angle corner valve set

All radiator valves are only suitable for two-pipe heating systems.

Also available in black matt

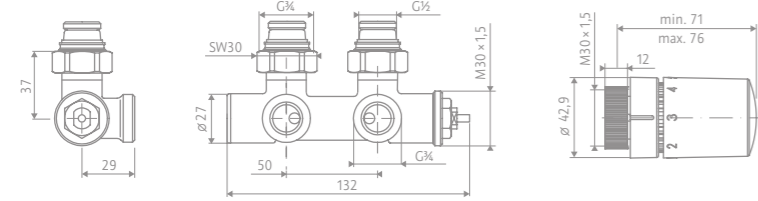

Flexible centre connection fittings

Two centre connection fittings offer increased flexibility during installation. Variable screw inserts allow the thermostatic head and the "flow" to be rotated so that they can be used on the left or right.

Connection and thermostatic fitting not included in the scope of delivery. The connection sets can be found from page 138 onwards. Subject to design and model changes. Technical specifications without guarantee. All dimensions are subject to a tolerance of ± 2 mm.

CENTRE CONNECTION WALL / CORNER VALVE SET

Consisting of fitting and thermostatic head (valve can be preset, thermostatic head can be limited), can be installed on both sides (change flow / return), integrated return screw connection (can be shut off).

Please indicate desired colour.

Standard compression fitting for copper or PEX pipes. Ideally matched to HSK standard fittings (G3/4 Euro cone).

Electric operation

Mixed operation

(Can only be combined with heating element 1 and heating element 2)

Designer radiators in electric and mixed operation

In addition to connection to the central heating system, many designer radiators offer the option of flexible and localised heating – either in pure electric mode or in so-called mixed mode.

All that is required for electrical operation is a power connection via the socket and a heating element. We recommend filling the radiator with a special water-glycol mixture.

In mixed mode, the radiator is connected to the central heating system and the immersion heater. This combines the advantages of both operating modes.

The Semprio, Yenga, Yenga Light, Yenga room divider, Line Plus, Line, Line Pro, Image and Atelier Highline ranges are suitable for electric and mixed operation.

GLYCOL

For purely electric operation
Bottle capacity 1.5 litres

Fill the radiator 95 % full with a water-glycol mixture.
The glycol content must not make up more than 15 % of the total filling volume.

HEATING ROD 4 WITH REMOTE CONTROL*

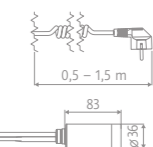

Protection class heating rod IPX5, remote control IP30
Intelligent heating element with adjustable daily/weekly programme, frost guard, coiled cable length 0.5 m (extendable to 1.5 m)

Heating rod available in white and silver, remote control in white.

The heating element cannot be combined with the mixed mode set.
The heating element and remote control must be located in the same room.
The remote control is battery-operated.

Power in watts	Article no.	White	Silver	Black
300	894300	310,-	354,-	354,-
600	894600	332,-	377,-	377,-
800	894900	354,-	399,-	399,-

All heating rods come with a two-pin plug. Please purchase UK adapter separately.
For technical reasons, the heating of the water-glycol filling causes operating noises during electrical operation.

Creative wall cladding

RENODECO

Set accents and conjure up a whole new atmosphere in your bathroom.

RenoDeco, the seamless wall cladding for an unusual bathroom design in partial renovations and new builds.

RENODECO | Creative wall cladding

High-quality

RenoDeco is a hard-wearing, scratch-resistant aluminium composite material with an easy-care surface. This wall covering is therefore ideal for wet areas – in the shower or behind the washbasin and WC.

Seamless

Where reliability and easy maintenance are important, RenoDeco is the right choice. The high-quality, waterproof material enables large areas of entire wall surfaces or individual functional areas to be covered – without any joints.

Decorative

Exclusive high-gloss surfaces bring brilliance and depth to the bathroom, while high-quality textured surfaces offer characteristic embossing of natural materials. The silk-matt surfaces achieve even more exclusivity with their elegant, matt look and slightly silky shimmer.

Customised

In addition to the extensive decor selection, you can also bring your own motifs and memories into your bathroom. With the customisable RenoDeco photo printing, there are no limits to the design.

Reno Deco wall cladding Larch, natural light (538).
Shower cubicle see page 44.

RENODECO

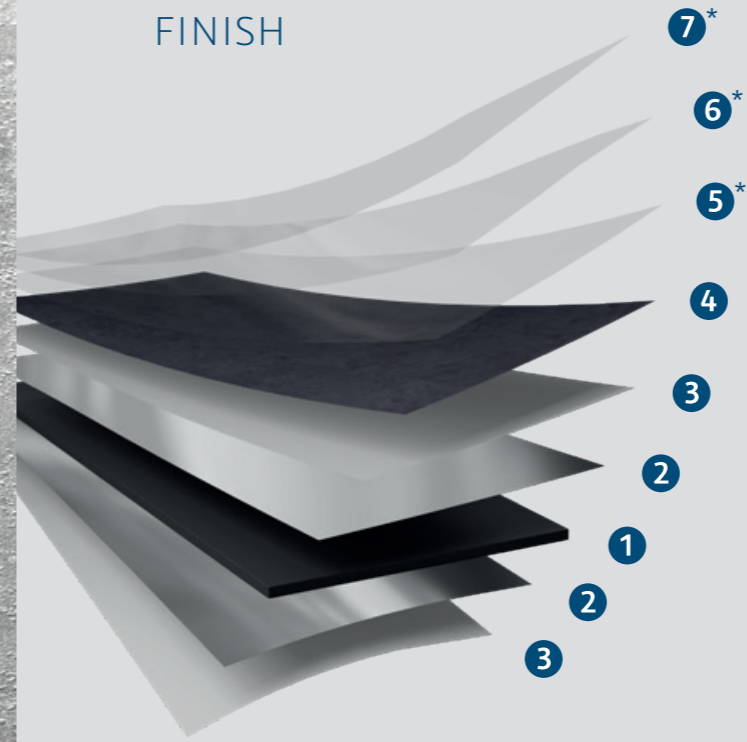

The finishing touch

Silk-matt, high-gloss, textured

RenoDeco not only impresses with its individual, fresh look, but also with its hygienic properties. The water- and scratch-resistant material and the high-quality surface finish also prevent dirt, mould and limescale from settling. Depending on the style and furnishings, you can choose between the three surfaces. Alternatively, they can be combined just as beautifully and effectively.

7 plus points that make the difference!

HIGH-GRADE, RUGGED LAYERED STRUCTURE THANKS TO SURFACE FINISH

7. Surface finish (*only with textured decors)

Offers striking embossing of natural materials for a genuine tactile experience

6. Top coating

Hard-wearing top paint coating for a perfect surface finish

*High-gloss and silk-matt finishes are composed of two highly abrasion-resistant paint layers

5. Basecoat

Highly abrasion-resistant paint coating

*High-gloss and silk-matt finishes are composed of three highly abrasion-resistant paint layers

4. Digital print

Six-colour printing for motives that tell a story

3. Primer

The job of the primer is to maximise the colour display and enable optimum adhesion.

2. Aluminium cover layer

HSK uses a high-quality, 0.3 mm aluminium cover layer instead of the commonly used 0.15 - 0.2 mm aluminium cover layers

1. Panel core

The core is made of premium LDPE polyethylene

Benefits

- Various designs with textured, high-gloss or silk-matt surfaces
- Three panel formats available to provide seamless cladding of larger wall surfaces in the blink of an eye
- Robust, classy surface finish for a long life
- 3 mm material thickness – requires very little additional wall texture
- Ample decor range with stone, wood, concrete, fine plaster, metal, tile, and uni-decors, plus custom prints with custom photos or motives out of the HSK image database
- Straightforward, easy to clean
- Can be worked and installed directly on site with standard tools

Properties

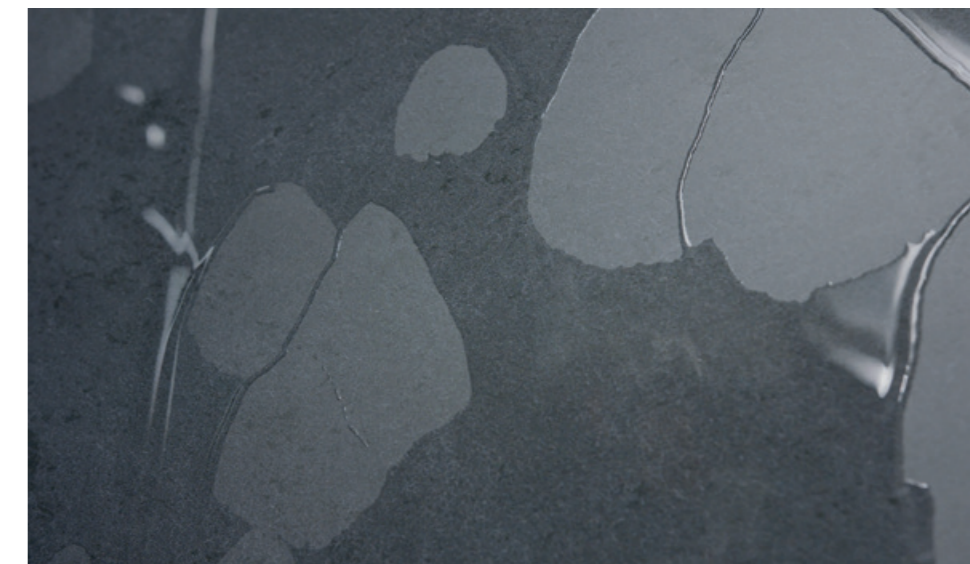

- Hygienically seamless, easy maintenance, water-resistant
- Durable, resistant and scratch-proof
- Colour-stable, food-safe and temperature-resistant up to +80°C
- Lightweight: 3.8 kg/m²
- Fire category B2 according to DIN 4102-1
- A+ classification according to French regulations for VOC emissions (emission-free)
- Perfect imitation of natural materials (stone, wood, etc.) thanks to tactile, textured surfaces
- Shaped design for manual edging of creative wall cladding with textured surface

Perfect hygiene thanks to the lotus effect

Thanks to the refined surfaces of the RenoDeco creative wall cladding, there is a strong beading behaviour. Water runs off the silk-matt and high-gloss surfaces almost without leaving any residue, while only drops of water remain on the hydrophobic surface of the textured paint. This guarantees easy maintenance of the wall panelling.

Versatile designs

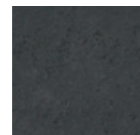

Velvety silk-matt, elegant high-gloss, strikingly textured

Exclusive RenoDeco high-gloss decors bring brilliance to the individual dream bathroom. The multi-layered lacquer texture ensures a sophisticated lustre with depth effect. The high-quality textured surfaces are almost indistinguishable from natural materials. The silk-matt surfaces, which are velvety soft to the touch and offer a high-quality, matt look with a silky shimmer, add even more exclusivity to the bathroom. The customised print is highly expressive – velvety silk-matt, elegant high-gloss or strikingly textured.

Everything in order

Perfect connections with aluminium profiles

The RenoDeco creative wall cladding can be joined seamlessly and reliably using slim aluminium profiles – whether around corners or on the surface. The flush, angular or optionally rounded profile provides a neat panel finish. The 3D corner provides a professional finish for three surfaces on an external corner, as with a pre-wall installation.

RenoDeco individual printing

There are no limits to your design ideas with RenoDeco

The extensive decor range picks up on current living trends and thus offers a wide range of options for giving the bathroom a modern, natural or imaginative touch. Only the integration of personal memories can be even more individual and original. The solution: RenoDeco allows you to add your own digital photo motifs to the wall. No matter which motif – there are no limits to your creativity. For example, bring the impressive rock formations of the Dolomites into your shower or immerse yourself in a lively underwater world with depth effect.

Many customised decors are available in the photo gallery and are updated on an ongoing basis.

CONFIGURE YOUR OWN BATHROOM LANDSCAPE

Quick and easy

Upload your personalised motif with the help of the easy-to-use configurator. In addition many great motifs in colour or black and white to choose from in the photo gallery. ready. Let yourself be inspired for your personal bathroom dream. You can find the RenoDeco configurator online at: individual.renodeco.de
